Running the Game

1. The game is distributed as a compressed zip file. To run the game, you will first need to extract the contents of the zip archive.
To do this, on a Windows PC, right click on the zip file *Bellum Deorum 1.0* and select *Extract All...*
To extract the file on a Mac, right click on the zip file and select *Open With --> Archive Utility (default)*.
If your Operating System does not have a native file archiving utility, you may need to download 7-Zip/WinRAR (download link provided above) or any other file archiving utility to extract the zip archive.
2. Once the file has been extracted, in order to run it, you need the *Java Runtime Environment (JRE)*. If you do not have the *JRE* already installed on your computer, download it via the link provided above. Once you have downloaded and installed the *JRE*, double click on the jar file (*Bellum Deorum 1.0*), located within the *dist* folder, to start the game.
3. For specific instructions on navigating through the main-menu screen and gameplay, please refer to the Instruction Manual located within the *dist* folder.
